## **1. Introduction**

In this paper we will outline the most important milestones and targets achieved up to this point, and the ones we wish to achieve in the next 2 years. We will draw a general visualization of the major goals, and when we plan on fulfilling them.

### **YEAR 2023**

#### **Q4:**

- Pre-planning.
- Market Research / find problems that need solutions.
- Finding a market fit.
- Creating the services & features to be included in Omnify.
- Deciding the initial networks Omnify will be deployed on.

### **YEAR 2024**

#### **Q1:**

- Mockups and logos generation.
- Frontend & UI development.

#### **Q2:**

- Smart contract development and debugging locally.
- Smart contract pen-testing and risk assessment (bugs, exploits, etc.).
- Reserve omnify.finance domain name.

#### **Q3:**

- Deploy on BSC test-net & Avalanche fuji to test in live environments.
- UI Back-end integration (hooking up the interface to the smart contracts via RPC endpoints, http requests etc.).
- Rigorous testing & debugging phase leading up to release.

#### **Q4:**

- All Omnify smart contracts deployed to 15 major Mainnets.
- Deployment of the Landing Page (omnify.finance) and App interface (app.omnify.finance).
- Launch Omnify hosted ICOs on all networks.
- Launch “Fjord Foundry” hosted ICOs.

## **YEAR 2025**

### **Q1:**

- Sell at least 50% of the total supply of Omnify Coin.
- Use funds generated by token sales to grow, and develop Omnify even more (user acquisition, Bridged token liquidity pools, marketing, influencer marketing).
- List Bridged tokens on native and cross-chain Dex's.
- Release Omnify documentation with instructions for developers to build on Omnify.
- Lock up between 12.5% - 50% of remaining OFY in a token vesting contract.
- Release OmniRefuel Feature on all supported networks.
- Develop all tracker and announcement bots on social outlets (Discord, Telegram, X).

### **Q2:**

- Release Omnify on more major mainnets: Ethereum, Unichain, InkChain, Sonic, Tron, Metis, X Layer, Omni Network, World, Peaq.
- Audit all Smart Contracts code from reputable firms such as OpenZeppelin.
- Audit the frontend code.
- Create Bug Bounty Hunt program.
- Translate frontend UI to more languages: Spanish, Portuguese, Korean, Mandarin, Japanese, Russian, German, Polish, etc.
- Apply for grants from any of deployed network's foundation org.

### **Q3:**

- Seek partnerships with other major blockchain applications and wallets.
- Create "Fee Keepers" and "Round Keepers" to maintain a stable fee peg, and automatically trigger distribution rounds periodically, making the DAO more decentralized and less reliant on human intervention.
- Support for ENS type addresses.

### **Q4:**

- Get Omnify listed on the official ecosystems of most or all the networks its deployed on.
- Create Galxe Quest profile.
- Partnership and Listing on Layer3xyz.
- Tracking volume and fees on DefiLlama.
- List OFY on Major Cex's.

## **YEAR 2026**

### **Q1:**

- Multi-asset trust deposits.
- Scheduled transfers and scheduled trust deposit unlock time.

## **2. Conclusion**

We addressed most milestones and achievements for the following 2 years. This roadmap will be appended with more milestones as new goals are set.
